International Partners of Euro Diving Zone Corp.

ABOUT SITEC

SITEC Flow Control LTD. is a registered corporation which is located in Shenzhen, China. The company started business in 2003 after spending several years manufacturing OEM HP, LP parts, and accessories for other companies.

Working side by side with international laboratories such as Hyundai Laboratory for material analysis, and contracting highly qualified and experienced engineers, SITEC started its own production of various types of gas driven boosters. In 2005 our boosters models received high recommendations and endorsements from governmental and commercial entities in Asia generally and in China specifically.

Our production increased on a wide scale and SITEC was sub-contracted by a few international companies that requested OEM products. In 2007, our partnership with Euro Diving Zone Corp. was established in order to design and produce specific models that would be ideal for diving applications.

SITEC gas boosters are piston-types, air-driven boosters, they used the differential piston area principle to operate. It features low air consumption, quiet operation, optional mechanical separation, and compatibility with a wide range of common gases.

The boosters can be installed as components or can be supplied as complete, ready-to-use power packages. Use of the boosters power unit eliminates the need to develop the basic power supply circuit, the time to select and buy the needed accessories and the time required to test and troubleshoot the circuit.

SITEC products are exported and distributed exclusively from China mainland through Euro Diving Zone Corp., Sweden. No other company is permitted to export or act as a forwarder from China mainland nor Honk Kong.

CATALOG GUIDE

SITEC BOOSTER TYPES -----	3
AIR BOOSTERS AB SERIES -----	4
GAS BOOSTERS SINGLE STAGE GB SERIES -----	5
GAS BOOSTERS SINGLE STAGE DOUBLE ACTING GBD SERIES -----	6
GAS BOOSTERS TWO-STAGE GBT SERIES -----	7
GAS BOOSTERS FOR DIVERS -----	8
LIQUID PUMPS AH SERIES -----	9
MINI LIQUID PUMPS M SERIES -----	10
LIQUID DOUBLE ACTING PUMP AT SERIES -----	11
SITEC BOOSTER SYSTEM -----	12
